

TECHNICAL DATA SHEET

FOAMDOCTOR G2777E

General Purpose Antifoam Agent

Description

Foamdoctor G2777E is a hydrocarbon based foam control agent for use in a number of applications where foaming is an inherent problem.

The benefits of using Foamdoctor G2777E are:-

- ❑ Reduced dosage rates.
- ❑ Cost effective formulation.

Product Application

Application areas include ;

- ❑ Effluent / wastewater treatment where the foam is surfactant or solvent generated. e.g. Paint denaturant systems, electroplating.
- ❑ Textile processing, including high temperature jet dyeing.
- ❑ Water based paint manufacture, emulsion polymerisation, latex, inks and coatings production.
- ❑ Distillation processes with solvent / water mixtures.
- ❑ Metalworking applications, including cutting oil formulations

Typical Physical Properties

Appearance	Yellowish to cream viscous liquid
Specific Gravity at 25°C	0.85 - 0.9g/cm ³
Active Content %	100
Viscosity at 25°C	500 - 2000 cps

Packaging Information

Foamdoctor G2777E is available in 205 litre, 1000 litre IBC containers or bulk road tanker deliveries.
