Description

FoamDoctor® F2996 is a non-ionic alkoxy polyol based food-safe foam control agent.

Applications

FoamDoctor® F2996 is formulated to eliminate unwanted foam in process waters during the washing, conveying and preparation of vegetables over a wide range of temperatures.

Product Features

FoamDoctor® F2996 is effective between 10°C and 90°C. It has a very low toxicity and is safe for contact with foodstuffs during processing. FoamDoctor® F2996 imparts no taste to foodstuffs when used as indicated.

Method of Use

FoamDoctor® F2996 should be used undiluted and dosed into the process water via a suitable metering pump (diaphragm, electrically or pneumatically activated, with an electrical sequence timer). The dosing rate and dosing point should be optimised by trial but is typically 5 - 100 ml per minute or 1 to 10 ppm.

Product Safety

A Safety Data Sheet compliant with EU 2015/830 is available for FoamDoctor® F2996 on request. It contains any safe handling guidelines that may be relevant to this product.

Storage, Shelf Life & Packaging

FoamDoctor® F2996 has a shelf life of 12 months when stored in original and unopened containers between 5°C and 30°C. It is available in 25kg, 200kg and 1,000kg packs.

Compliance

- US FDA CFR 21 173.340 (Defoaming Agents)
- European Union EU 231/2012 (Food Additives)
- French Arrêté du 19 Octobre 2006 (Food Processing Aids)
- Kosher and Parev (Manchester Beth Din)

Typical Properties

- Appearance: White milky liquid
- Solids: 35.0 – 39.0 %
- Viscosity: 1500 – 2500 cP

Please note; these are typical properties only and should NOT be construed or used as a specification for this product.
